iWrap
Intelligent pallet wrap

Intelligent Pallet Wrap that safely
reduces plastic waste and cost

“

Did you know?
On average you should be using
around 98 grams of film to wrap
a standard pallet?

”

**Shrink your plastic
use by half and
unlock savings of at
least 35% with iWrap**

Commercial benefits

On average, you can expect to see at least a 35% saving in pallet wrap product cost with iWrap.

Even though iWrap is made up of 11 layers, these are incredibly thin as well as being extremely strong. This combination means that every pallet can be wrapped with at least 300% stretch capacity. What does this mean for your warehouse operations? 1 meter of film will provide a 4 meter yield. It is this combined tensile strength at stretch that delivers unparalleled plastic and cost savings, as well as reliable product protection.

Receiving broken and or damaged consignments will impact your business commercially.

Money is wasted on the damage to the items themselves and there is the recovery cost to get goods returned, whilst time is spent processing and preparing an exchange pallet of new goods. The commercial risk remains however, with no guarantee goods will reach the destination unscathed.

iWrap has been tested to provide unparalleled load stability and puncture resistance to get your goods to their destination safely whilst protecting your reputation with your customers.

Reduce your plastic tax liability and save your customers money without affecting your margins using iWrap.

Switch to a high-performance film and use less film to wrap your pallets.

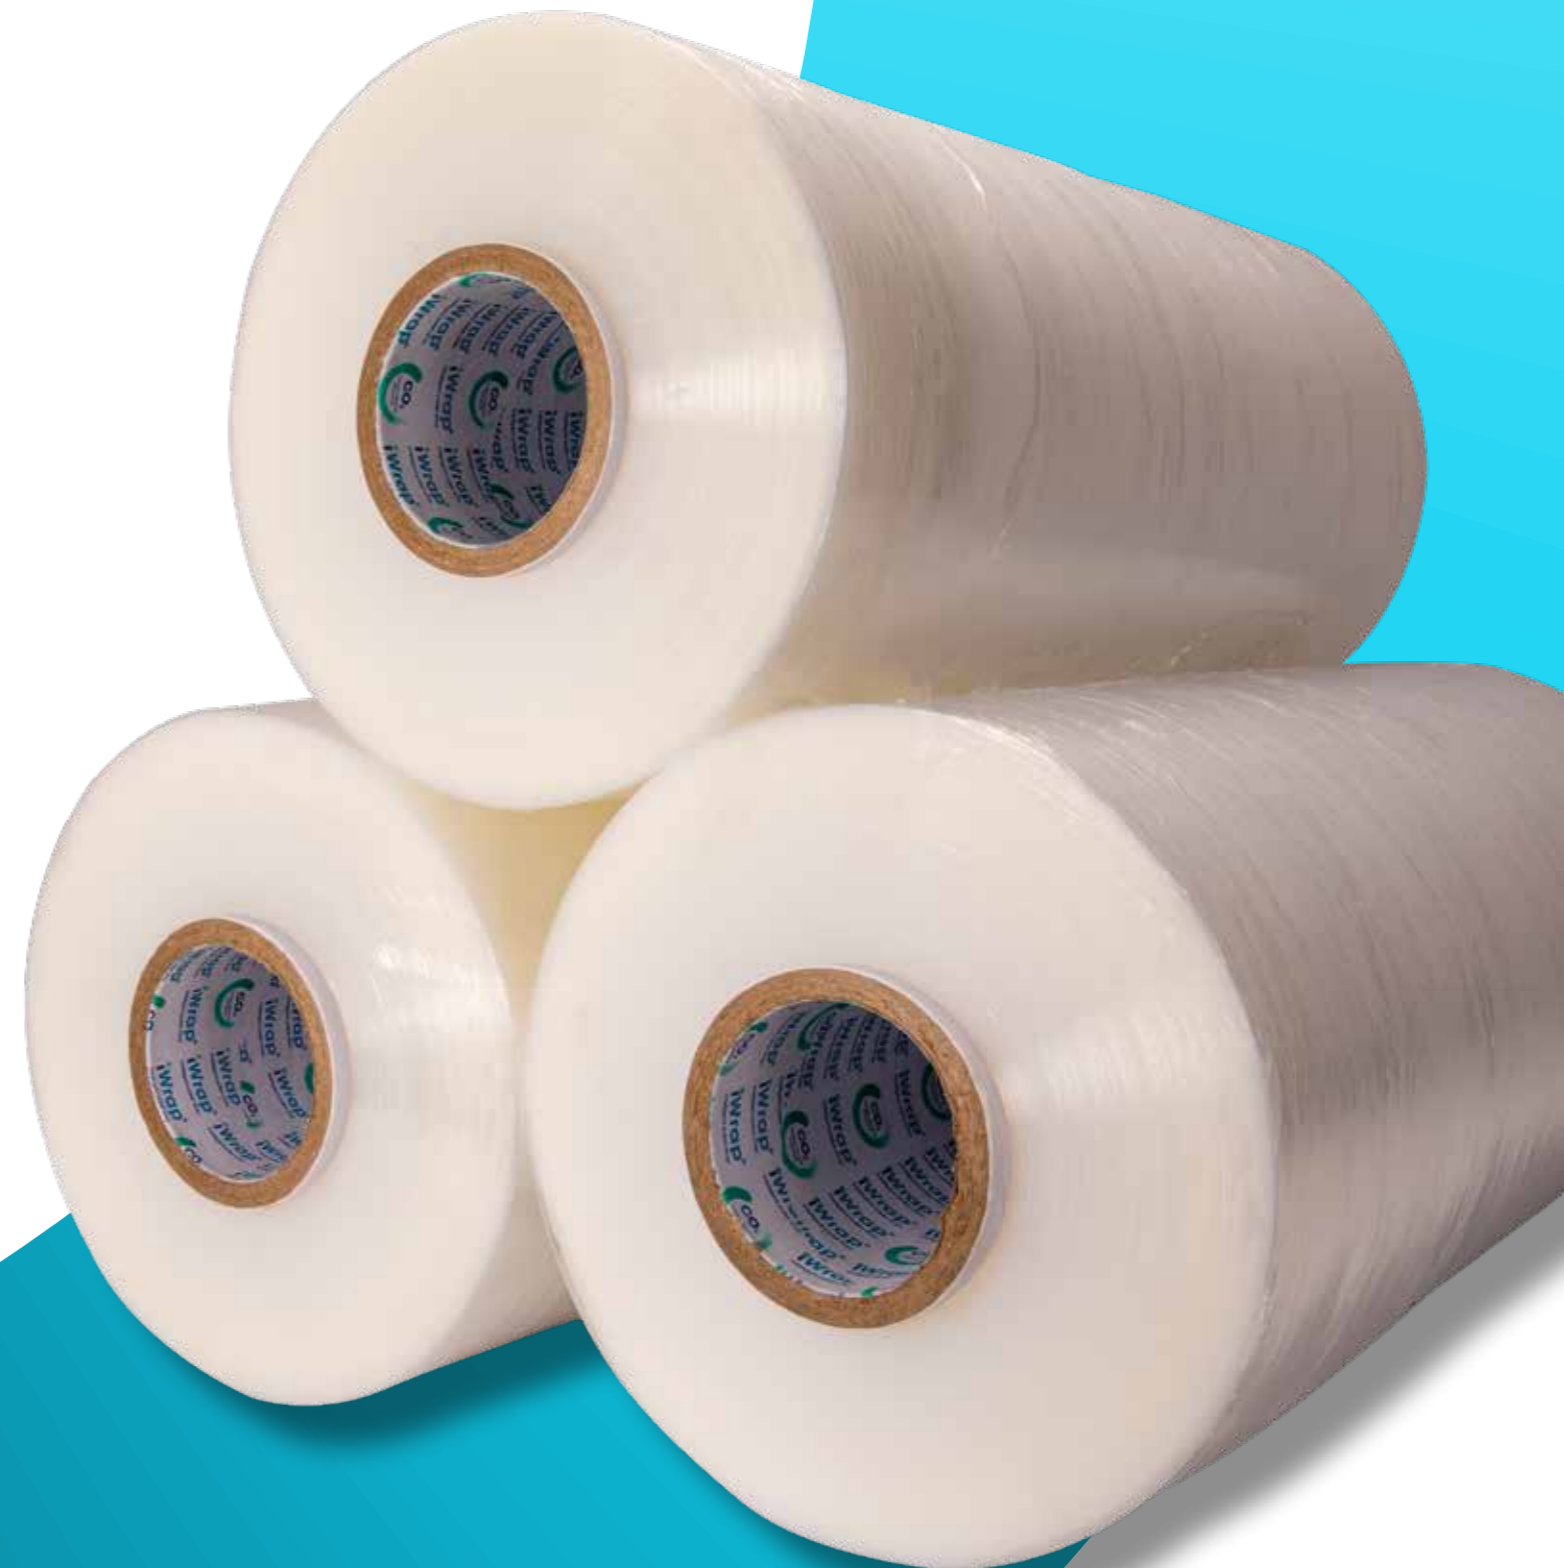

As a result your customers benefit from a reduced amount of plastic packaging at their end to dispose of.

Save 10.35 person days or 1,509 less roll changes per year as was found by a leading UK Food & Drink company using iWrap.

Carbon Neutral Purchasing now available across the iWrap range of high performance film

What are the implications of not reducing plastic waste?

2022 saw the introduction of the Plastic Packaging Tax in the UK.

According to a recent UK study, more than 1.3 billion tonnes of plastic could enter the environment globally by 2040. The Plastic Packaging Tax is a green initiative to encourage the use of recycled rather than new plastic within plastic packaging. Every one of us has a responsibility to work harder to prevent further damage to the environment and for many businesses, this starts with the amount of plastic being used in transporting goods.

Understanding how new high performance eco-friendly plastic packaging products can help your organisation develop a more sustainable packaging approach is critical for enabling the path to boosting brands, products, and operations – as well as saving you money. 6 out of 10 businesses are reporting a rise in packaging costs in the wake of The Plastic Packaging Tax.

At Acopia we can help you make the sustainable packaging and process choices that are right for your organisation. From making sense of PPT to guiding your business towards solutions which provide real benefits to the environment and to you.

You can find out more about the Plastic Packaging Tax and the on-going impact on your business in our free eGuide.

Call us on 033 033 300 21 for more information.

Helping you make the right sustainable packaging and process choices.

Environmental benefits

We estimate that the UK alone uses over 140,000 tons of pallet wrap every year. It's hard to imagine what that kind of volume looks like.

And how a product like this could possibly deliver sustainability on any level!

How can machine pallet wrap be eco-friendly?

iWrap's eco-credentials go hand in hand with its cost-saving properties. iWrap is a high performance intelligent machine pallet wrap and truly a best-in-class product.

The single-use plastic savings are unparalleled compared to any other pallet wrap on the market today. It's these plastic savings that have really spoken volumes to brands that are committed to reducing the amount of plastic when they are using iWrap.

One client we are working with has seen game-changing benefits with 42.13% less plastic going to landfill as well as a reduction of 2,467.2 kgs of cardboard used each year.

Who would have thought this huge reduction in environmental impact could be delivered by a machine pallet wrap.

“

One client saw game-changing benefits with 42.13% less plastic going to landfill as well as a reduction of 2,467.2 kgs of cardboard used each year.

”

Did you know? 4% of loaded pallets are damaged in transit.

In 2020, it was estimated that there were 250,000,000 pallets being used across the UK, meaning at least 10,000,000 were damaged in transit.

Be at best practice

Making sure you are using the correct amount of film at the right cost to your business is very important.

Typically, a lot of people procuring pallet films buy on the price of the film and not the cost per pallet wrapped which is the true cost to the business.

Also understanding how films should perform is vital to ensure you maintain pallet stability so that your pallets arrive at the destination undamaged and without risk.

Importance of Load Retention

Maintaining pallet load stability and safety standards is the responsibility of everyone in the business: from the boardroom to the warehouse floor.

Loads that are not properly secured and shift in transit can lead to road accidents and even fatalities.

Negligence carries harsh penalties including the loss of your Operator's Licence, prosecution by the HSE and even the prospect of corporate manslaughter. In addition, the cost to the business could include the clean-up, stock loss, cost of resupply and of course reputational damage.

Under present UK law, the maximum penalty for an offence under road traffic act 1991 if committed in respect of goods vehicle is a £5,000 fine, 3 points and even disqualification!

How much plastic are you using to wrap your pallets?

Find out with a free pallet wrap audit.

Your first step in implementing plastic reduction when you're shipping at scale is to understand how much plastic you're using right now.

With 79% of the plastic ever produced still in the environment, the answer lies in using less plastic altogether.

Using less plastic pallet wrap by using a high performance alternative such as iWrap means reducing your costs as well as your environmental impact – you'll also see a cut in Plastic Packaging Tax associated costs too.

Our completely obligation free pallet wrap audit provides:

- An overview of your current processes
- Calculation of your current plastic use
- Like for like wrapping comparison demonstration with a recommended stretch film product
- A complete report on your Plastic Use Profile with cost and plastic savings you can make.

The Carbon Neutral Guarantee

You may also qualify for offsetting your complete pallet wrap purchases with us.

Call us on 033 033 300 21 to find out more.

Talk to us today about a Pallet Wrap Audit – your first step to cost and plastic reduction.

The iWrap range of high-performance machine pallet wrap film for both Power and Brake stretch machines.

”

Get complete visibility of your pallet wrap operation

The perfect machinery and film set-up will bring huge value to your business but it's a job to know where to start such as understanding which machinery and high performance film is right for your operation and it's costly to get this wrong.

iWrap Managed Services minimises your risk and increases your opportunity to drive efficiencies.

It's a total solution that not only takes the headache out of machine and film selection but also how you fund it as well.

It also gives you complete insight on how your palletising operation is running and help when things go wrong with access to day to day reporting as well as historical data – you can even track your pallet wrap use by the hour.

It's a completely new approach to palletising and running your despatch operation.

“

Track your film use and performance by the hour with iWrap Managed services

”

“

Historical and day-to-day reporting at your fingertips

”

Track your entire pallet wrapping operation with iWrap Managed Services

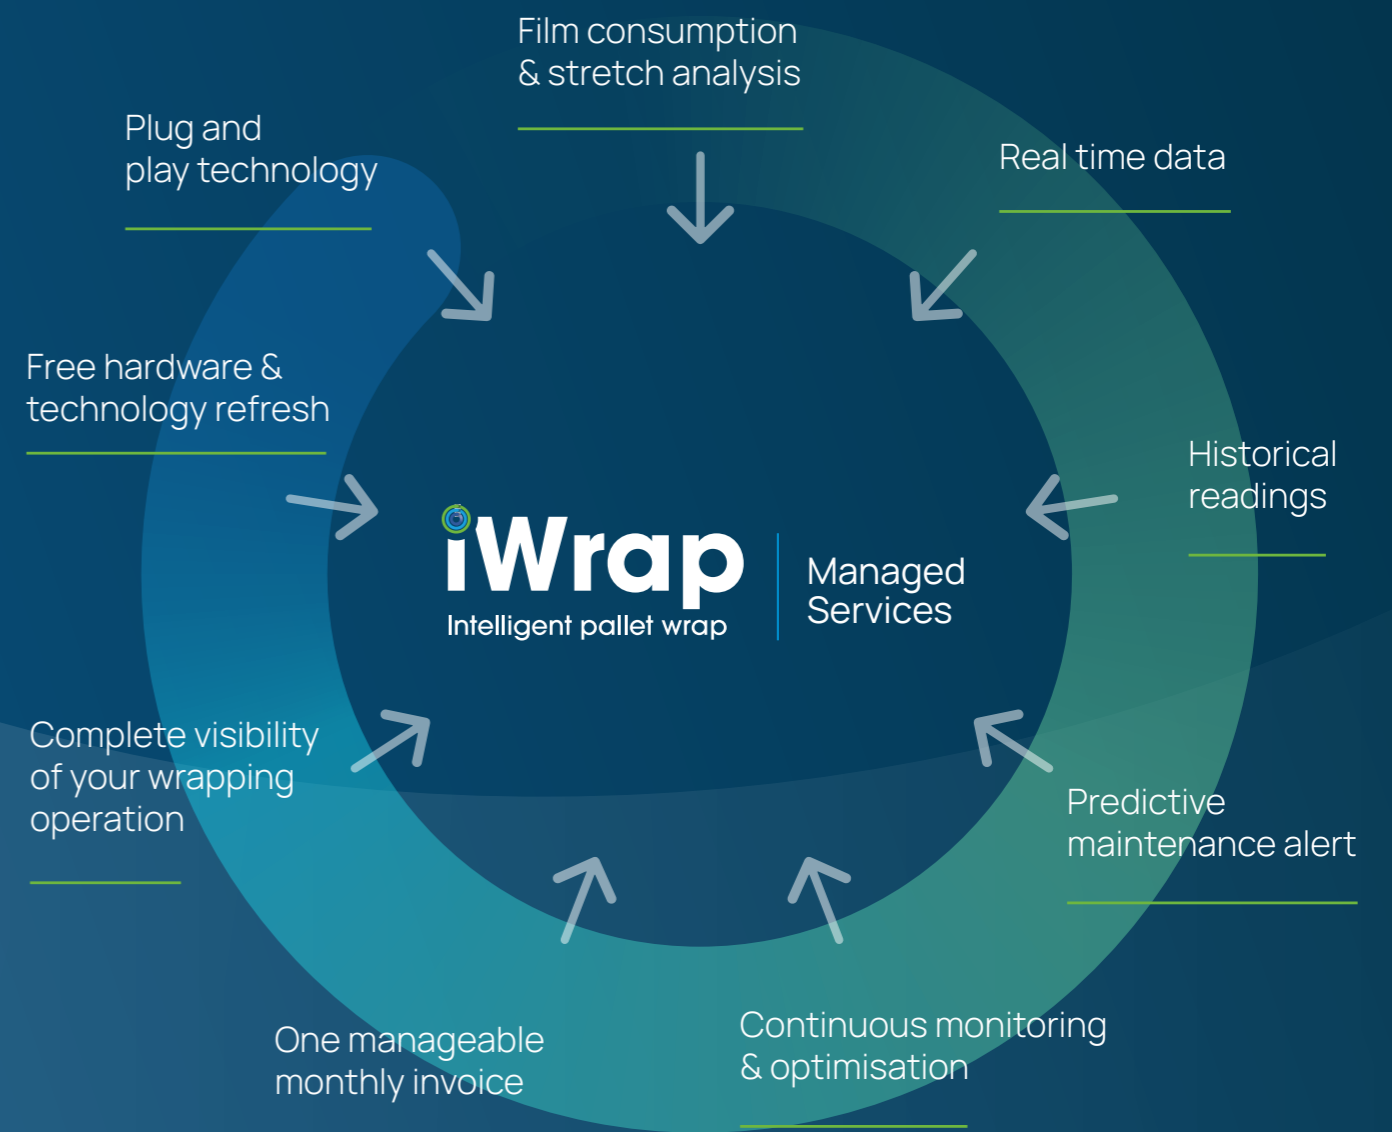

Investing in the latest pallet wrap machine technology can create a step change in your operation by speeding up your processes, making your business more efficient and competitive.

Introducing iWrap Managed Services

- A full turnkey service, saving you both time and money, whilst delivering a significant ROI
- An innovative way to finance and manage your pallet wrap operations – a fixed and predictable, low-cost solution
- Total solution funding: hardware, annual maintenance, break fix maintenance, configuration, performance management and monitoring and pallet wrap consumables – all for a simple low monthly cost
- Capex vs Opex – as a Managed Service, it's highly tax efficient and helps retain your working capital
- We design your solution to meet your budget requirement and pallet wrap consumption, including hardware, pallet wrap, maintenance, and services
- Free hardware and technology refresh
- Reduce risk whilst maximising performance – we take full responsibility, we manage and monitor the entire solution for you, so you don't have to worry

Financing your pallet wrap operation has just got easier allowing you to benefit now, minimising your risk as well as freeing up business capital.

Save time, save money and drive efficiencies

Partnering with Acopia

What you can expect...
Let's show you how we are able to produce
great results for our customers every time.

About Acopia

Acopia has been supporting leading brands for over half a century. We help businesses like yours everyday with sustainable solutions for packaging, process improvement and the supply of everyday essentials and consumables across industry and retail. We focus on helping customers drive down their costs as well as their plastic use.

Our strapline, Together Better, reflects our collective, collaborative approach to business and partnership as well as the comprehensive range of products and services we offer.

Our packaging products and consumables are sourced locally and globally, stored and delivered at point of need, with the sole aim of sourcing the best possible solutions for your specific needs at competitive prices.

To find out more about the work we do and how we can support your journey to minimising your costs and environmental impact – get in touch with the team on 033 033 300 21 or email hello@iWrapuk.co.uk

Accreditations & Sustainability

The mark of responsible forestry

Acopia are carbon neutral

We are proud to report that we have achieved Carbon Neutral status as verified by Carbon Neutral Britain and we are in partnership with the Woodland Fund to offset our carbon emissions which we continue to monitor closely.

Acopia is FSC® Chain Of Custody Certified

Procure with confidence from our range of FSC® Certified products.

Have the reassurance that every step of the process is guaranteed by the Chain of Custody which remains unbroken right through to production – from the forest to the final packaging product.

We are committed to ensuring the FSC® paper resources we use come from responsibly managed forests, protecting vulnerable habitats.

Agents and Brokers

CERTIFICATED

BRCGS

The BRCGS standard demonstrates our commitment to food safety integrity standards across our supply chain, providing complete reassurance for our work with customers in the Food & Beverage sector.
